C.) Creating Repository step by step without command:

Step 1: After successfully setting up GitHub account login to your account. You will see the screen as below.

Step 2: Click on the + sign ,then New repository option.

Step 3: After clicking new repository option, we will have to initialize some things like naming the project, choosing the visibility etc. After performing these steps click **Create Repository** button.

Create a New Repository

Owner ^{*} Repository name ^{*}
